Company Profile

About Us

Located in Luoyang, we are an enterprise integrating R&D, design, production, sales, installation and service of wire mesh products.

Core Business

- ✓ Fence Nets & Highway Fences
- ✓ Perforated Mesh & Chain Link Fence
- ✓ Stainless Steel & Zinc Steel Fences
- ✓ Custom Solutions & Project Installation

Our Vision

To be a global leader in providing innovative and reliable wire mesh solutions.

Quality Commitment

We adhere to strict quality control standards to ensure product excellence and customer satisfaction.

Experience & Strength

Over 30 years of industry experience, serving customers worldwide with professional services.

Privacy Fence

High-Quality Material

Crafted from aluminum alloy/galvanized steel/PVC/anti-corrosion wood, sturdy and lightweight, adaptable to diverse installation needs.

Weather Resistant

Corrosion & rust resistant, withstanding wind, sun, impact, and harsh outdoor conditions like humidity and high temperature.

Usage scenario

Diverse minimalist styles with customizable height & color, sleek lines matching various architectural designs. Widely used in courtyards, villas, residential communities, factories and commercial parks, for privacy protection and site enclosure.

Long Service Life

Anti-aging for outdoor use, 15-20 years lifespan for aluminum/steel types, 8-12 years for PVC ones, high durability.

Double Wire Fence

Cost-Effective Solution

Simple structure, less material usage, and easy transportation result in lower overall project costs.

Enhanced Protection

Integrated with brick-concrete walls to overcome rigidity weaknesses and boost security performance.

Long-Lasting Durability

Triple-layer protection (galvanizing, primer, powder coating) ensures corrosion and UV resistance.

Workshop Fence

High Strength

Crafted from square steel pipe, ensuring exceptional durability and load-bearing capacity.

Superior Stability

Robust welded construction and galvanized wire mesh for long-lasting reliability.

Versatile Application

Ideal for isolation and protection in factories, workshops, warehouses, and more.

Effectively isolates workshop areas to ensure the safety of workers and equipment.

3D fence

Durable Material

High-quality steel with hot-dip galvanizing for superior corrosion and weather resistance.

Simple Structure

Composed of peach-shaped columns and connectors, ensuring easy and quick installation.

Versatile Application

Ideal for highways, villas, airports, public areas, and scenic spots requiring isolation and protection.

A perfect blend of aesthetics and security for modern infrastructure.

PV Fence

High-Quality Material

Crafted from premium low-carbon steel wire for superior strength and durability.

Weather Resistant

Plastic-coated surface resists corrosion, UV rays, and harsh weather conditions.

Enhanced Security

Protects personnel safety and prevents theft of valuable equipment.

Long Service Life

Designed for longevity, ensuring a reliable solution for your PV station.

Stadium Fence

Specialized Design

Tailored for stadiums, basketball courts, volleyball courts, and training venues.

On-site Installation

Posts and fences can be constructed and installed directly at the site.

High Flexibility

Mesh structure, shape, and size can be adjusted to meet specific requirements.

A versatile and durable protective solution for modern sports facilities.

Steel Plate Mesh Fence

High Strength & Durability

Made of high-quality steel plate, offering exceptional strength and resistance to damage.

Corrosion & Oxidation Resistant

Maintains structural integrity and appearance in harsh environmental conditions.

Easy Installation & Maintenance

Simple to install and clean, with minimal maintenance required over time.

Wide Applications

Highways

Urban Roads

Residential Areas

Airports & Venues

Chain Link Fence

Uniform Mesh & Flat Surface

Ensures consistent protection and a sleek appearance.

Durable & Corrosion Resistant

Thick wire diameter for long service life in harsh conditions.

Versatile Applications

Ideal for highways, railways, construction sites, and agriculture.

A cost-effective and reliable fencing solution for both commercial and residential use.

Prison Fence

High-Strength Materials

Combines blade barbed wire and reinforced welded mesh for maximum durability.

Anti-Climb Features

V-shaped support columns and blade barbs deter unauthorized climbing attempts.

High-Security Applications

Ideal for prisons, detention centers, and other restricted areas requiring top-tier security.

Airport Fence Net

High Strength & Security

Composed of robust V-shaped columns and welded mesh for maximum protection.

Critical Infrastructure Use

Ideal for airports, military bases, and other high-security facilities.

Enhanced Anti-Climb

Equipped with hot-dip galvanized blade barbed wire for added deterrence.

Anti-aging

Sun Protection

Corrosion Resistance

Railway Fence

High Strength & Stability

Made of high-quality low-carbon steel, ensuring durability and overall stability.

Easy Installation

Simple grid structure for convenient transportation and quick setup.

Terrain Adaptability

Ideal for mountainous, sloped, and winding railway sections.

A critical safety infrastructure and an integral part of railway aesthetics.

Anti-throw Fence

Durable Materials

Made of low-carbon steel and aluminum-magnesium alloy for long-lasting use.

Novel Design

Lightweight, aesthetically pleasing, and available in various styles.

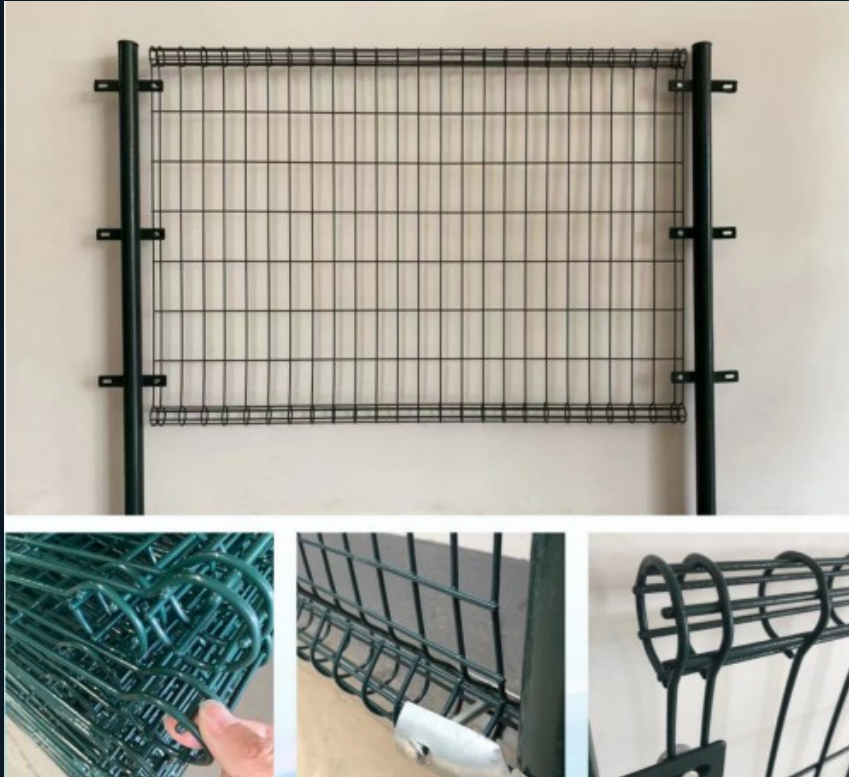

Eco-Friendly & Reusable

Easy to disassemble, reusable, and can be reconfigured as needed.

The anti-throw Fence is designed to prevent objects from falling from bridges and overpasses. Its lightweight and durable design make it an ideal solution for urban infrastructure.

Double Circle Fence

High Strength & Rigidity

Made of cold-drawn low-carbon steel wire for superior durability and structural stability.

Aesthetic & Practical

Beautiful appearance with a wide field of vision, bright color, and lightweight design.

Corrosion Resistant

Galvanized and plastic-coated surface treatment for long-lasting resistance to the elements.

Wide Applications: Highways, Airports, Municipal Green Spaces, Gardens, Ports, etc.

Customs Fence

Important Safety Facility

Widely used in borders, docks, airports, and factories for national security and property protection.

Strong Blocking Ability

Effectively prevents illegal entry of personnel and vehicles with its robust structure.

High Visibility

Easy to detect potential intruders, making it a strong deterrent against illegal activities.

Meige Fence

Premium Materials

Woven/welded with high-carbon steel, galvanized wire, stainless steel, or aluminum alloy.

Durable Finishes

Options include cold/hot galvanizing, dip coating, and spray coating for long-lasting protection.

Key Advantages

High strength, rigidity, aesthetic appeal, easy installation, and resistance to fading/deformation.

Applications

Highways

Railways

Airports

Ports

Yards

Perforated Mesh Fence

Product Features

Premium Material

Constructed from high-quality perforated metal plates, ensuring strength and longevity.

Customizable Design

Available in various hole patterns (circular, square, diamond) to meet diverse aesthetic needs.

Aesthetic & Functional

Combines modern visual appeal with robust security for both indoor and outdoor applications.

Robot Fence

Sturdy Construction

Carbon steel frame ensures high strength and durability.

Versatile Specifications

Available in various mesh sizes and colors for customization.

Anti-Corrosion & Longevity

Resistant to corrosion, ensuring a long service life in harsh environments.

Workshop & Warehouse Partition

Robot & Equipment Protection

Blade Mesh Fence

High-Strength Material

Constructed from robust steel for exceptional durability and resistance.

Effective Deterrent

Sharp edges and robust design prevent unauthorized access efficiently.

Environmental Adaptability

Corrosion and wind-resistant, suitable for harsh outdoor conditions.

Industrial Areas & Military Bases

Prisons & High-Security Facilities

Municipal Fence

Wide Application

Suitable for urban arteries, highways, bridges, and toll gates.

Enhanced Safety

Provides reliable safety guarantee for pedestrians and vehicles.

Durable & Eco-friendly

Corrosion-resistant, high-temperature resistant with long service life.

Customizable Dimensions

Height and width can be tailored to meet specific project requirements.

Highway Fence

Easy Installation

Assembled wire mesh for quick setup and replacement.

Modular Design

Freely combinable to meet diverse traffic needs.

Durable & Strong

Bright colors and high strength for long-lasting use.

Applications

Ideal for road construction, traffic diversion, and area separation.

PVC Fence

High Strength

Reinforced with steel, offering superior strength compared to wood.

Durable & Aesthetic

Smooth surface with vibrant colors, resistant to fading and cracking.

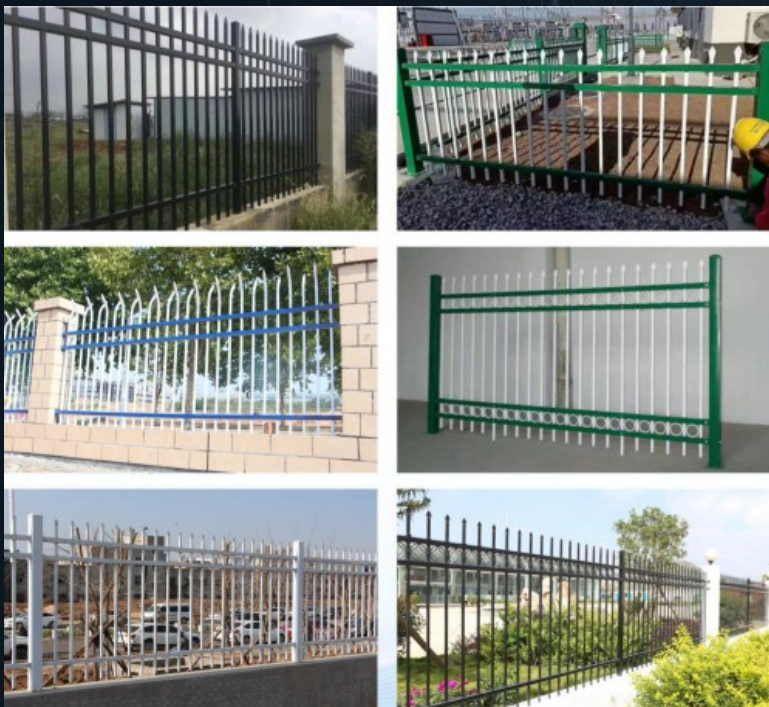

Low Maintenance

Corrosion and weather-resistant, requiring minimal upkeep.

A cost-effective, versatile solution for urban roads, residential and commercial applications.

Zinc Steel Fence

High Strength & Hardness

Crafted from premium zinc alloy for exceptional durability and security.

Aesthetic & Vibrant

Modern design with a bright, corrosion-resistant finish that enhances any property.

Low Maintenance

Eliminates rust and the need for welding, offering a long-lasting solution.

The perfect balance of strength, style, and affordability for modern residential and commercial applications.

Lawn Fence

Aesthetic Decoration

Enhances the beauty of gardens, paths, and urban roads with a bright and clean look.

Vibrant Color Options

Available in white, blue, red, green, etc., with bright colors and a smooth surface.

Easy Installation

Patented friction-fit or proprietary connectors for quick, simple, and secure assembly.

The lawn Fence is designed to protect and enhance the beauty of green spaces, suitable for parks, gardens, and residential areas.

FRP Fence

Key Features

High Strength

Exceptional load-bearing capacity for maximum safety.

Corrosion Resistant

Unaffected by chemicals, saltwater, and harsh weather.

Lightweight & Aesthetic

Easy to install and visually appealing design.

Applications: Rivers, Chemical Plants, Power Plants, Scenic Spots, Municipalities, etc.

Stainless Steel Fence

Corrosion Resistance

Suitable for both indoor and outdoor applications with long-term durability.

High Strength

Provides reliable safety protection with excellent structural integrity.

Elegant Aesthetics

Sleek and modern design that enhances the look of any environment.

Easy installation, low maintenance, and a long service life make it the preferred choice for construction projects.

Bridge Fence

Product Features

Enhanced Safety

Prevents vehicles and pedestrians from accidental falls, ensuring maximum protection.

Robust Construction

Composed of Fence frames, anchor bolts, and support beams for durability.

Integral Component

An essential part of the bridge structure, ensuring overall integrity and safety.

Wrought Iron Fence

Enhanced Safety

Provides robust perimeter security and protection for various spaces.

Elegant Aesthetics

Classic and intricate designs that enhance the beauty of any environment.

Durable Construction

Crafted from high-quality iron for long-lasting performance and resistance.

Residential Districts

Garden & Courtyards

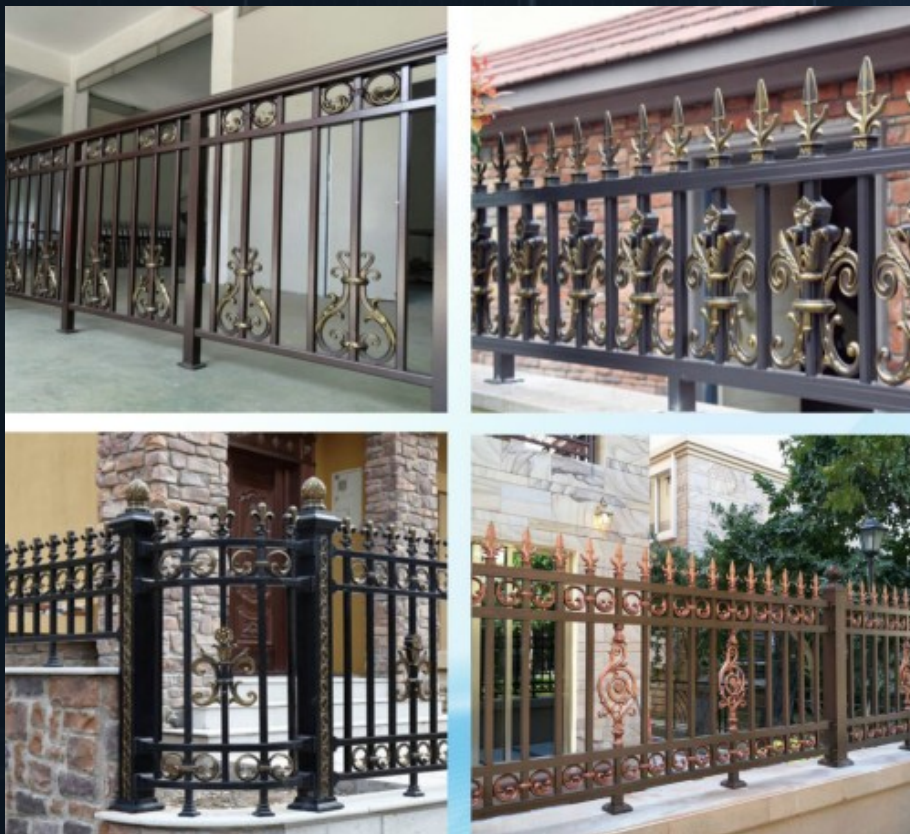

Public Places

Squares

Aluminum Art Fence

Premium Material & Craftsmanship

Crafted from high-grade aluminum alloy, featuring punching, welding, phosphating, and high-temperature baking finish.

Versatile & Stylish Designs

Blends European and American styles with modern fashion, offering a wide range of shapes and specifications.

Easy & Efficient Installation

Designed for quick and straightforward assembly, significantly improving on-site installation efficiency.

Wide Applications

Ideal for stairs, balconies, windows, platforms, corridors, villas, and both indoor and outdoor settings.

Air Conditioning Fence

Safety Protection

Prevents accidental contact with outdoor units, ensuring safety.

Multiple Types

Grid, louver, and railing types to meet diverse needs.

Premium Materials

Crafted from durable zinc steel and aluminum alloy.

Ideal for residential districts, villas, schools, and more.

Balcony Fence

Safety Protection

Ensures the safety of balcony users with robust construction.

Diverse Materials

Available in stainless steel, aluminum alloy, tempered glass, etc.

Wide Application

Ideal for residential districts, villas, schools, and offices.

A perfect blend of durability and modern aesthetics for your space.

Electronic Fence

High Security Perimeter

Composed of pulse generators and fences, providing theft prevention and real-time alarm functions.

Low False Alarm Rate

Advanced detection algorithms ensure reliable performance and minimize unnecessary alerts.

Unrestricted by Terrain

Easily deployed in various environments, from flatlands to complex terrains.

Widely Used

Substations, Factories, Communities, Schools, Airports, Military Bases, etc.

Corrugated fence

Highway Safety Standard

Essential safety feature for highways, roads, and bridges.

Dual-Wave & Three-Wave Types

Available in two main configurations to meet diverse protection needs.

Robust Structure

Composed of W-shaped steel plates and columns for maximum impact absorption.

crowd control barrier

Multipurpose Use

Ideal for road construction, traffic control, and event isolation at stations and airports.

Core Function

Maintains traffic order and stability with excellent flexibility and infinite connection capability.

Practical & Aesthetic

Combines high durability and practicality with an attractive, modern appearance.

Foundation Pit Fence

Product Features

Core Protection

Prevents people or objects from falling into the pit, ensuring on-site safety.

Sturdy Structure

Composed of protective nets and columns with screw ears for easy installation.

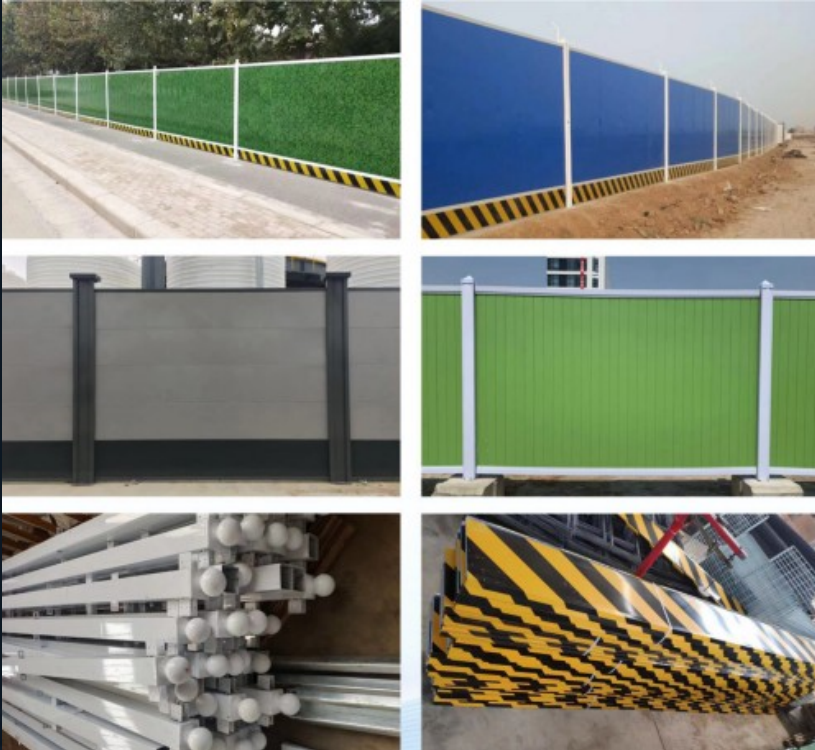

Standard Dimensions

Typically 1.2m in height and 2m in length, suitable for most construction scenarios.

High-visibility with warning slogans and yellow-black/red-white color schemes.

Color Steel Enclosure

Product Features

Secure Isolation

Effectively separates the construction site from the external environment, ensuring safety.

Height Standards

Minimum 2.5m for main roads and 1.8m for other areas, meeting municipal regulations.

Flexible Application

Commonly used as semi-enclosed barriers in municipal engineering and road works.

Perforated metal hoarding

Product Features

Barrier & Protection

Ensures safe construction with effective isolation and protection.

Aesthetic Urban Enhancement

Beautifies the urban landscape and promotes standardized construction.

Durable & Customizable

Made of galvanized steel with customizable grids and surface treatments.

Artificial bamboo fence

Ecological Integration

The artificial bamboo fence is an eco-friendly fence that mimics the shape and color of natural bamboo. It blends seamlessly with flowers and plants, creating a more harmonious surrounding environment.

Durable Coating

Electrostatic spraying ensures bright color, strong adhesion, and long-lasting durability.

Aesthetic & Cultural Value

Adds a touch of natural beauty and cultural charm to urban landscapes.

An ideal choice for parks, gardens, and natural settings, combining aesthetics with robust performance.

Fence barrier

Product Overview

Natural Protection

Crafted from wood, bamboo, or shrubs to protect yards and gardens.

Windbreak & Microclimate

Creates optimal growing conditions by shielding plants from harsh winds.

Customizable Solutions

Available in various specifications to meet specific needs and purposes.

Barbed Wire Fence

Automated Manufacturing

Twisted and woven by fully automatic machines for consistent quality.

Diverse Surface Treatments

Options include galvanizing, plastic coating, and spraying in various colors.

Versatile Applications

Ideal for borders, railways, highways, and other isolation needs.

Superior Durability & Defense

Offers strong wear resistance and effective deterrence against intrusion.

Galvanized Barbed Wire

Superior Anti-Rust Treatment

Available in hot-dip and cold galvanizing for enhanced corrosion resistance.

Automated Precision Weaving

Produced by fully automatic machines in single or double-wire twisted designs.

Versatile Applications

Ideal for security in gardens, prisons, borders, railways, and highways.

Core Advantage: Hot-dip galvanized finish ensures long-lasting protection in the harshest environments.

PVC-coated Barbed Wire

Corrosion Resistance

PVC coating provides excellent protection against rust and harsh weather conditions.

Durable & Long-lasting

Anti-aging and sun-proof properties ensure a long service life.

Aesthetic & Practical

Available in various colors, combining visual appeal with strong deterrence.

Easy Installation

Rapid construction saves time and costs while achieving effective security.

Barbed razor wire

Superior Deterrence

Sharp blades provide an effective physical barrier against unauthorized access.

Durable & Weatherproof

Corrosion-resistant and UV-protected for long-lasting performance in harsh environments.

Easy Installation

Designed for quick and convenient deployment, reducing installation time and costs.

Key Applications

Industrial & Mining

Residential Complexes

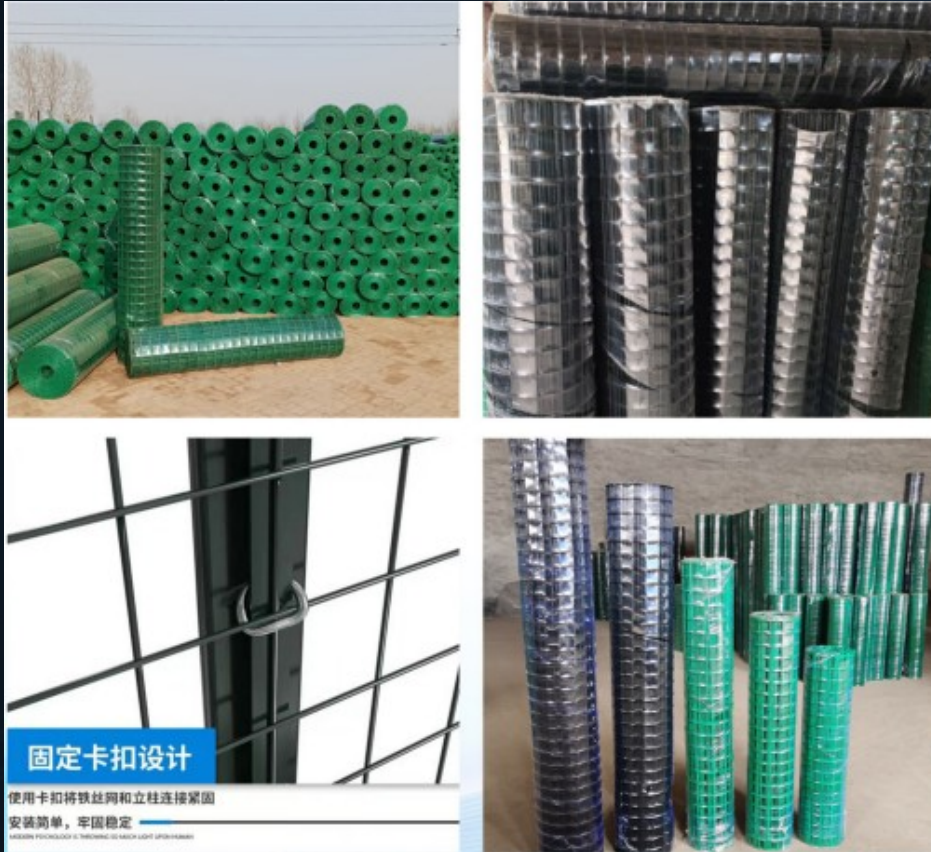

Government & Military

Correctional Facilities

Dutch Net

Product Features

Durable Construction

Welded from galvanized wire and coated with green powder for corrosion resistance.

Versatile Specifications

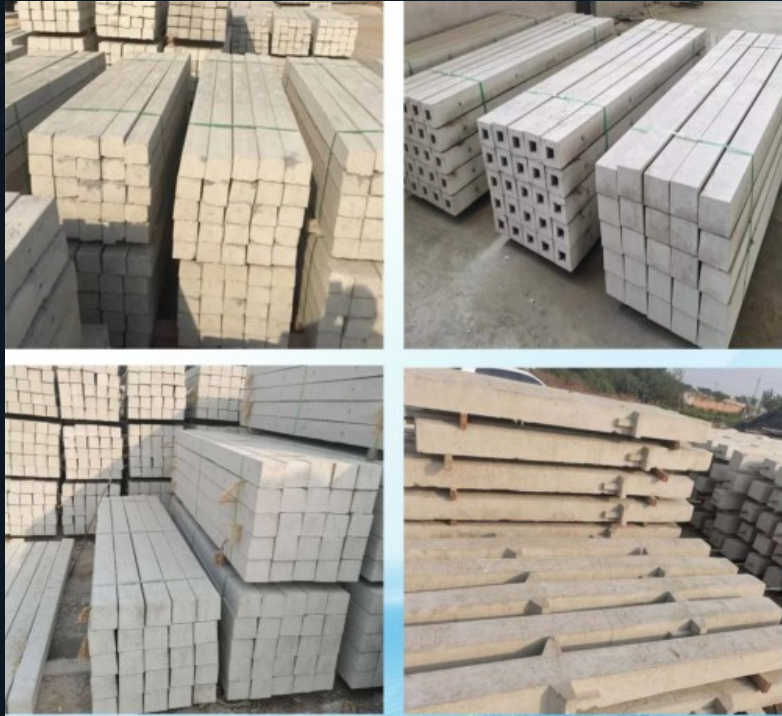

Available in dark green/grass green with wavy or non-wavy mesh options.

Broad Applications

Ideal for highway isolation, animal husbandry, land enclosure, and agriculture.

Cement Column

Sturdy Structure

Composed of steel frame and high-grade cement, ensuring exceptional strength and durability.

Versatile Applications

Ideal for structural support, door/window arches, and indoor/outdoor decorations.

Standard Installation

Typically buried $\frac{1}{5}$ of its total length for maximum stability (e.g., 3m for a 15m pole).

A robust and reliable building material, the cement column is engineered for both functionality and aesthetic appeal in diverse construction projects.
